QuicKlean™ Mopping System

Lightweight mop and revolutionary microfiber wipes combine for unprecedented performance

Contec's QuicKlean mop is changing the level of clean for the USP<797> market. The combination of the lightweight, easy to maneuver hardware and particle pick-up capacity of the microfiber wipes deliver unprecedented performance.

The QuicKlean mop head frame is available in durable plastic. The foam mop head is laminated with knitted polyester and is abrasion resistant. The cleanroom laundered microfiber wipe delivers the maximum amount of microfiber to pick-up and retain particles, dust and other contaminants. Compatible with a wide range of disinfectants, chemicals and solutions, Contec’s QuicKlean mop offers users a lightweight option for wet or dry floor, wall, and ceiling cleaning.

| Foam mop head laminated with knitted polyester | • Abrasion resistant
• Compatible with a wide range of disinfectants and cleaners
• Safe for use with all disinfectants including bleach and quaternary ammonium |
| Disposable microfiber wipes | • Non-shedding with excellent cleaning efficiency for wet and dry cleaning
• Ideal for gross contamination deposited on equipment, floors, walls, and ceilings
• Cleanroom laundered to enhance cleanliness |

*All cleaning materials, such as wipers, sponges, and mops shall be nonshedding, preferably composed of synthetic microfibers (page 54 Revision Bulletin <797> Pharmaceutical Compounding - Sterile Preparations)
The QuicKlean™ Mopping System, coupled with Contec’s revolutionary microfiber wipes, is the solution to your USP <797> mopping needs. This system can be used for daily floor maintenance as well as monthly ceiling and wall cleaning.

**Daily Floor Cleaning and Disinfection:**
1. Attach Task0100 foam mop head to the bottom of the blue QuickClean frame
2. Place the mop head onto one disposable microfiber wipe. Center the mop head in the middle of the wipe. The length of the mop and wipe should be the same.
3. Wrap the wipe to the top of the mop frame and push through the “keepers” on the back. The “keepers” will hold the wipe in place.
4. Liberally spray the mop head with the approved disinfectant/cleaner or immerse in double bucket system and then mop.
5. Change the disposable wipe as needed. It is recommended that the wipe be changed when visibly soiled.*
6. Repeat the process with Contec Sterile IPA or DI water to remove any residue from disinfectant/cleaner if needed.
7. Discard the soiled wipe after use.
8. Discard the TASK0100 foam mop head if visibly soiled. Do not use more than 7 days.**

* This may be more frequent during the first cleaning due to the microfiber wipe’s ability to clean soil that other systems have left behind.

** When using accelerated hydrogen peroxide, phenolic, quaternary ammonium, or IPA based disinfectants, the mop head should be used no more than seven days and should be replaced sooner if visibly soiled. The mop head should be used no more than one day if used in conjunction with sodium hypochlorite (bleach) solutions.

**Monthly Ceiling & Wall Cleaning and Disinfection:**
1. Repeat the steps outlined above. Due to the low soil load on these surfaces, you may or may not choose to use the microfiber wipe in conjunction with the TASK0100 foam mop head.
2. Discard the TASK0100 upon completion. Change the TASK0100 during the process if it becomes visibly soiled.

*NOTE: 6% or greater bleach solution will discolor the TASK0100 foam mop head after a 24 hour period of time. It DOES NOT degrade the mop head.*
